SCI AUTOMATION

Newsletter Issue #7 | January 2018 | www.sciplasma.com

Dear Reader,

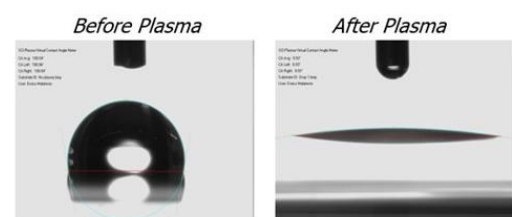

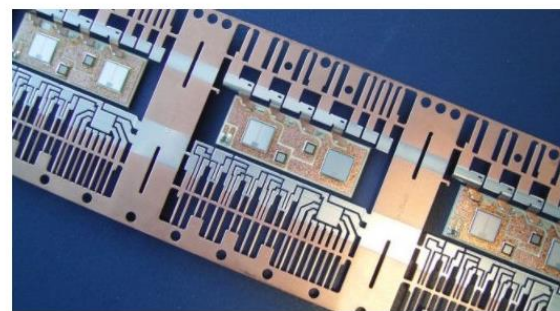

Happy New Year, and welcome to our first issue for 2018! The SCI team ended 2017 on a great note, and after the holiday season, we are back, refreshed and recharged for 2018!

RESEARCH AND DEVELOPMENT

Here in SCI, our team of engineers are always improving on our processes to increase cost effectiveness and efficiency.

If you are unsure how plasma cleaning helps with your profits, or undecided on which type of plasma cleaning system to purchase, our team is ever-ready to assist.

We welcome you to explore our systems to determine which is best suited for your production needs.

Our engineers frequently receive samples to test on our systems – this gives you the chance to experience which machine addresses your requirements. [Contact us](#) to organize your first tests!

If you're undecided about how plasma technology can help make your process more efficient, contact us for a consultation and trial today!

SCI PLASMA SYSTEMS

SCI provides inline, strip and batch systems for lead frames, substrates, wafers, and modules.
