# SCI AUTOMATION

Newsletter Issue #16 | Jan 2019 | [www.sciplasma.com](http://www.sciplasma.com)

Dear Reader,

Welcome to our first newsletter issue for 2019! SCI Automation ended 2018 on a very positive note, and after the holiday season, we are back to provide you with sales, after sales service, process consulting and more.

## SCI's 2018

Our main effort in 2018 was to reduce cost, focus on productivity and quality, and penetrate new markets and customers. Our team has performed well. We have increased both productivity and quality of our products, we have improved on our capacity to supply process development to our customers and we have reorganized our logistics to assure timely deliveries. Our staff has increased by 20% in 2018.

In terms of financial results, we have been maintaining a steady and profitable growth. We will continue our efforts to improve the relationship with our existing clients and source new business opportunities.

January 1<sup>st</sup> marked our 19<sup>th</sup> year of operation. 2019 will find us very busy with new exciting R&D projects and we will introduce not less than 2 new plasma cleaning systems. [Ask us about our Industry 4.0 solutions](#). We look forward to providing you with our best service and **wish you a productive and successful 2019.**

Contact **SCI Automation** for standard or customized process solutions.
