

SCI AUTOMATION

Newsletter Issue #5 | November 2017 | www.sciplasma.com

Dear Reader,

Here in SCI, we recognize that you, our customer, are the most crucial component of our business. It is with this focus in mind that we approach our interaction. We are dedicated to understanding your requirements so we can recommend a system well-suited to your needs.

Our SCI engineers understand that in some processes, a machine needs to be adaptable to its environment. As such, the [Aeon](#) was designed with flexibility in mind.

A compact standalone batch system, this system comes with different configurations allowing it to be adaptable to your various plasma processes.

The [Aeon](#) packs a punch regardless of its small build. In addition to its standard features, you have the option of including:

- Hydrogen generator
- Dry or oil vacuum pump
- Extra shelves kit
- Other components upon discussion

Our wheels are always turning. At SCI, our [R&D](#) constantly opens new paths to make our machines more efficient and more adapted to the ever-changing needs of our customers.

Innovation is the foundation of our work and you are right at the forefront of creation with us.
